DETAILED ACTION

1. Response to Arguments

2. Applicant's arguments see page 5 line5, filed 7/10/03 with respect to claim 38 have been fully considered and are persuasive. The 112 first paragraph rejection of claim 38 has been withdrawn.

3. Applicant's arguments filed 7/10/2003 have been fully considered but they are not persuasive.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992).

As per claims 39-45, the action relies on Zdybel in view of Laszlo, utilizing Laszlo to point to other related documents. The examiner respectfully asserts, over the applicants argument, that it would have been obvious to combine Laszlo with Zdybel. It is well known in the art that the bar code reader is a standard to obtain data from hardcopy documents. Zdybel and Lazlo use this technique in a major portion of their respective inventions. Therefore it would have been obvious to modify Zdybel's document system with Lazlo's links to other documents in

Art Unit: 2134

order to link other relevant electronic documents to Zdybel's hardcopy, such as in a multimedia presentation.

4. Response to Amendment

As per claims 29-38, In response to applicant's amendments, the recitation "that point to another document" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

The device used in the rejection of the instant specification is suitable to read any information. The device makes no distinction between links that point to other documents or the same documents.

The grounds of the rejection are maintained and are to be found in paper #29.

5. Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher J Brown whose telephone number is 703-305-8023. The examiner can normally be reached on 8:30-6:00.
